

PROJECT: St Paul's Girls School, Hammersmith

CLIENT: St Paul's Girls School, Governors

DESIGNER: Chelsom in conjunction with M&E consultants Perfectair

LAMPING: 12 x 42W 4 pin PL lamps plus additional downlight

METAL FINISH: Satin black with antique gold highlights

DIFFUSER: White acrylic

GLASSES: Ribbed opaque glass

DIAMETER: 2780 mm x 2780 mm square

HEIGHT: 3900 mm

Completely energy-efficient, the fittings incorporate compact fluorescent lamps throughout which are dimmable to accommodate a variety of ambience for multi-purpose usage of the hall.

Imposing due to their size, yet elegant through their interlinked welded scroll construction, the fittings gracefully complement the rich original oak panelling and delicate leaded windows of this exquisite building. The existing winches were retained but were modified with an improved raising and lowering system to facilitate ease of maintenance. Limited doorway access to the hall demanded the fittings be constructed in 3 interlocking sections.
