ASTRO LIGHTING

The latest addition to Astro's extensive lighting portfolio is the Fold collection. The design presents a simple structure that captures the moment a soft material is frozen as it drapes over a linear form.

A wonderfully minimalist lighting design, the Fold will complement any hospitality setting and can create a cohesive lighting scheme within a room. A linear LED chip is tucked into the shade of folded metal, producing either a strong, defined strip of light when faced down towards the surface, or a long wash of light across the surface when the head is tilted. A clear frosted diffuser protects the LED and diffuses the light. The luminaire is fully adjustable thanks to its low glare shade.

The complete collection includes wall, floor and table variants available in contemporary finishes of matt black, white and nickel to complement any interior space.

CHELSOM

Orb from Chelsom is one of the signature ranges from the latest collection Edition 26, presenting a range of elegant contemporary fittings with timeless appeal that would be an impressive addition to a wide variety of interior schemes.

The Orb ceiling fittings feature matt opal hand blown glass globes teamed with Brushed Brass cups with a decorative laser cut Prince of Wales check pattern. Arms are in contrasting Satin Black fixed to central support rings. Chandeliers are suspended from three fine strainer wires adjustable for height during installation and are available in a variety of sizes with a wall light alternative also available.

ELSTEAD LIGHTING

Featured is the Simon wall light with swivel functionality for bedside or desk lighting. This vintage inspired silhouette has a two-tone finish in Midnight Black with burnished brass accents. Elstead has been manufacturing and distributing decorative lighting for 50 years and now offer a bespoke shade making service ideal for hospitality projects. Elstead's showroom in Alton has 2500 decorative lights on display, and many new models will be launched at the Light + Building show in Frankfurt next month on stand A30, Hall 6.1.
