EDITION 27 CHELSOM

More than two years of in-house design led by Robert and Will Chelsom has resulted in the launch of Chelsom's brand new collection, Edition 27.

Edition 27 is an eclectic lighting collection that harnesses and refines the latest trends in finishes and materials. Striking brass tones, textured Venetian glass and cutting-edge LED pieces are just some of the elements that dominate this new collection, offering designers creative lighting solutions for any interior space from guestrooms, to corridors, through to restaurants and other public spaces.

Amongst many things, Edition 27 offers the widest collection of LED reading lights in the company's history, including the LED Eye range, which moves on the aesthetics of a standard bedside reading light, while maintaining all the successful features of function and light output.

The new collection is intended to reflect Chelsom's brand image, showcasing a range of beautifully designed lighting products, specifically created for the global hospitality and marine interior design marketplaces. More than 40% of the collection is completely new, and all pieces are available with LED light sources to accommodate the latest developments in technology and energy efficiency.

Will Chelsom, Managing Director, tells darc: "I believe that our clients will appreciate the refinements we have made to our product collection in terms of even sharper product designs, higher quality levels and a strong focus on value engineering."

Robert Chelsom, Chairman, adds: "In all my years working within the industry, never has there been a more challenging yet exciting time to be designing lighting products. Triggered by fashion cycles, interior trends are moving increasingly faster and in doing so constantly stimulate new design directions when it comes to finishes and materials, which is something we have given careful consideration to."

"Edition 27 has been a fantastic collection to produce. Will and I are proud to be able to say that all products have been designed in-house to create this diverse lighting collection that truly caters for all levels of the hospitality and marine sectors."
