CHELSON

As part of the latest collection, Edition 27 Chelsom wanted to move on the aesthetics of a bedside reading light whilst maintaining all the successful features of function and light output. The starting point was to create a product that was inconspicuous in that it nestled successfully into a headboard with minimum projection and yet was cool and stylish to look at when guests first entered the room. Development led to a compact and slim outer vessel, which surrounded the 'eye', a sculptured cast metal piece which invites the hotel guest to open the eyelid thereby illuminating the light and allowing a full range of movement to create the perfect light split.

ASTRO

A blend of precise detailing and desirable finishes, Astro's new Mitu collection injects elegance and contemporary style to any hospitality setting. Providing optimum illumination via a directional hand-stitched fabric shade, the perfectly proportioned design fits seamlessly into interior schemes and is ideal for bedside illumination or living areas. Featuring Bronze and Matt Nickel finishes, a unique metal plate sits neatly within the shade circumference to gracefully conceal the light source from above. Available as a floor, table, and wall light, the collection also includes a swing arm option for those looking for an adjustable mounted wall light that retains modern flair.

ALISEO

NU finish assortment complements Aliseo's superlative craftsmanship with a commanding range of colours that conforms to the finish of choice. A perfectly integrated personal statement that completes the coordinated transformation of the components of the room as a whole.

Aliseo utilises PVD – a special Physical Vapor vacuum type process that produces a brilliant decorative and durable coating. Simple to clean and highly resistant to scratches, NU colours is available in a wide variety of surface finishes, brushed or polished.

A fresh aesthetic performance that radiates the distinctive personality of the mirror while expanding the choices available to the hotelier.
